

# Ahmed Salem Bahamat

Technical Product Manager · AI-Native Builder

Riyadh, Saudi Arabia · ahmdsa06@gmail.com · +966 53 504 4384 · [ahmedbahamat.com](http://ahmedbahamat.com) · [linkedin.com/in/ahmed-bahamat](https://linkedin.com/in/ahmed-bahamat)

---

**Product manager who designs, builds, and ships.** I take an idea to a working prototype in one to seven days — designing the interface with AI design tools, building the product with Claude Code as a development partner, and validating with real users. I've independently created ten early-stage products across AI agents, B2B SaaS, an operations ERP, a marketplace, and EdTech: one launched and preparing go-to-market, one entering pilot, and an AI agent I'm now rebuilding for production. I'm building on this with structured AI product-management courses. Owning the full product loop — solo and fast — is how I work.

## HOW I WORK

---

- Own the full loop end-to-end: frame the problem, **design the interface, build the product, and test with users** — solo and fast.
- Design UI quickly with AI tools (**Figma, Claude Design, Google Stitch**) — generating on-brand interfaces from prompts and adapting strong templates.
- Build with **Claude Code** as a development teammate — describe the outcome, review, and steer, instead of long PRDs and hand-offs.
- Go deep on a narrow problem; ship a testable prototype in **days**, then learn from real users before scaling.

**SELECTED BUILDS** early-stage products built end-to-end — full portfolio at [ahmedbahamat.com](http://ahmedbahamat.com)

---

**Logistic System** — Operations ERP for food-delivery companies, managing order intake and task routing across every department.

*Key product decision: modeled the real hand-offs between teams instead of a generic admin panel. · Status: started 13 May 2026, built in 1 week, now in staging — entering a limited pilot.*

**Fragra-World** — Two-sided marketplace for pre-owned niche fragrances, with built-in auctions for rare pieces.

*Key product decision: focused on a small, passionate community over a broad, indifferent market. · Status: built in 4 days; launched, preparing go-to-market.*

**Tarsya AI** — AI agent that turns simple company inputs into submission-ready technical & financial proposals for Saudi government tenders (Etimad).

*Key product decision: focused on a narrow niche (Saudi + government + Arabic) where generic LLMs fall short. · Status: first version built in 1 day; now rebuilding for production.*

**Also built (7 more):** an AI telesales assistant (real-time call scripting + CRM pipeline) · Rasad Time, remote attendance with no geo/IP/face-scan requirement · Clubs Platform, kids'-club SaaS with parent progress tracking · Marj3, spaced-repetition for multi-disciplinary professionals · Alsawi, a trainer–student courses platform (beta live) · Earab, leveled Arabic-grammar learning · and the Tarsya tender-prep landing page.

## CORE SKILLS

---

**Product:** discovery & JTBD · prioritization (RICE / MoSCoW) · MVP scoping · rapid prototyping · user validation · roadmap · funnel & North-Star · Google Analytics

**Design:** rapid UI design with Figma, Claude Design & Google Stitch — prompt-based generation with brand direction, and template adaptation

**Stack:** React, Next.js, Laravel, Python · PostgreSQL · OpenAI API integration

**Build & ship:** Claude Code, Codex, Replit, Lovable (AI-assisted) · AI agents · Hostinger & DigitalOcean · GitHub · Notion, Obsidian, Slack, Jira

**Learning:** Product Development & Management — Hsub Academy (completed) · AI Product Manager — IBM / Coursera (in progress) · Artificial Intelligence: ML, LLMs & AI agents — Hsub Academy (in progress)

**Domains & Languages:** AI agents · B2B SaaS · marketplaces · ERP / operations · EdTech | Arabic (native) · English (intermediate)

## EXPERIENCE & EDUCATION

---

**Technical Product Manager — Masar Al-Safwa Logistics Services, Riyadh — 10/2025–Present**

- Build and ship products end-to-end — design, development with Claude Code, and user testing.
- Created ten early-stage products — AI agents, B2B SaaS, ERP, marketplace, EdTech — concept to prototype in days.

*Bachelor of Law, College of Business Administration — Prince Sattam University, 2017*
